

YOUR BEST OFFENSE IS DEFENSTAT™

Attack Foodborne Illness
The Clean Label Way

DefenStat provides intervention against *E. coli* and *Salmonella* in raw meat and poultry by addressing the three systemic failures leading to foodborne outbreaks. This includes a significant reduction in pathogen survival even if undercooked by the consumer.

In the absence of a thermometer, protect your reputation. Make these illness-causing organisms more susceptible to destruction by heat with DefenStat.

Get Peace of Mind.
